SLIDES
Functional Specification

Brought to you by Blue Crew
Last Updated: February 12, 2019

Overview
Slides is a slide editing and presentation software that lets you share your projects and ideas with style!

This spec is currently being updated as our software grows to fit user experience. Stay tuned for continued updates.

This spec does not cover technical algorithms, libraries, or code implementation used by the software. It is here to inform the user about our wonderful product, its features, and how to make the most of your slides!
